Users can choose from multiple forecast sources and assign each source a custom weight and can be adjusted in 5% increments for:
- **Daily forecasts:** Days 1–15
- **Period forecasts:** Days 1–5, 6-10, 11-15, Mon-Fri, etc.

Edit Specific Locations

Edit Minimum Temperature (°F) for Day 8 - Tue Dec 2 ✕

CODE	CITY ⊕	MIN TEMP	DFN	30YR NORMAL
KMDW	Chicago Midwy, IL	10 ↓	-19	29
KORD	Chicago OHare, IL	12	-16	28
KDEC	Decatur, IL	10	-19	29
KFWA	Fort Wayne, IN	12 ↓	-16	28

X-Cancel   Save

After setting their forecast weights, users can manually fine-tune individual values, such as nudging a city down by 2°F, capturing microscale weather features that global models may overlook, giving them even greater control and precision in their final forecast.
